TEXTILE FRAME

COSIGN TEXTILE FRAMES: INFINITE POSSIBILITIES

Textile frames are the solution for the fast and easy exchange of printed textile fabrics. The image is printed on a textile fabric and a silicon beading is added around it. This is simply pressed into the profile that ensures that the slightly stretchable fabric can be stretched perfectly.

The convenience of use of our aluminium profiles in combination with innovative accessories and high-quality textile fabrics that can be printed up to 3 m wide seamlessly means that our textile frames are perfectly suitable for dressing and setting up shops, showrooms, offices and fair stands. Regardless of whether you want a wall frame or a standalone or hanging frame, you will find the right solution with our single- and double-sided textile profiles.

Cosign also offers LED profiles in which you can integrate High Power LED modules that will ensure that the fabric is lit up uniformly and the image is done even better justice. You can also include a noise-dampening material behind the printed fabric to improve the acoustics of a room or to create partitions.

You will not just find the profiles and accessories at Cosign, you can also order the full custom-made product including the printed fabric.

LES CADRES TEXTILE DE COSIGN : DES POSSIBILITÉS INFINIES

Les cadres tissu tendu sont la solution idéale pour pouvoir remplacer rapidement et facilement les tissus imprimés. L'image est imprimée sur un tissu, et tout le périmètre de ce dernier est muni d'une bande en silicone. La bande s'insère facilement dans le profilé de façon à tendre parfaitement le tissu légèrement extensible.

La facilité avec laquelle nos profilés en aluminium peuvent être combinés à des accessoires innovants et à des tissus de haute qualité, susceptibles d'être imprimés sans jointure sur une largeur atteignant 3 m, fait de nos cadres tissu tendu la solution idéale pour l'habillement et l'aménagement de magasins, showrooms, bureaux et stands de foires. Que vous recherchiez une enseigne à fixer au mur, à suspendre ou à poser librement, vous trouverez certainement une solution adaptée dans notre collection de profilés pour tissu tendu simple face ou double face.

Cosign propose également des profilés LED dans lesquels peuvent s'intégrer des modules LED High Power de façon à éclairer uniformément le tissu et à mettre encore plus en valeur l'illustration. Il est également possible d'ajouter un matériau insonorisant derrière le tissu afin d'améliorer l'acoustique d'un local ou de créer des cloisons.
