Specialty Films Solutions

Quality

Our products meet your high quality demands

- Our quality management system certified according to **ISO 9001:2008** guarantees the constantly high quality of our products.
- Our commitment to quality applies to all levels within our company.
- The majority of our films satisfy food contact requirements as stipulated by the EU Regulation **(EC) No. 10/2011** (article 16, 22 and relative amendments).

Sustainability

Environmental sustainability and resource protection

At Bilcare Research we are totally dedicated to environmental sustainability and the protection of our finite resources.

- Our certification for environmental management system **ISO 14001:2004** goes far beyond the necessary local and legal demands for environmental protection.
- None of our films contain polycyclic aromatic hydrocarbons, phosphor phthalates, cadmium or lead stabilisers.
- When compared to other plastics, the Carbon Dioxide (CO₂) emissions associated with PVC manufacture are correspondingly low.
- PVC films can be recycled in many different ways.
- All substances used in the production of our films are in compliance with **REACH (EC) 1907/2006**.
- PVC films only contain 43% crude oil and support the protection of our finite resources.
- Our Waste Management System has enabled us to guarantee a more effective, clean recycling of our production waste.
